Affairs; Indiana University–Purdue
University Indianapolis

Indiana University Public Policy Institute

The IU Public Policy Institute, established in 1993 within the Indiana University School of Public and Environmental Affairs (SPEA), delivers unbiased research and data-driven, objective, expert analysis to help public, private, and nonprofit sectors make important decisions that directly impact quality of life in Indiana and throughout the nation. Using the knowledge and expertise of a multi-disciplinary staff and faculty, PPI provides data and analysis that addresses a wide range of issues. PPI helps leaders, citizens, businesses, and organizations solve problems, seize opportunities, and create positive change. PPI also supports the Indiana Advisory Commission on Intergovernmental Relations (IACIR).

Indiana University School of Public and Environmental Affairs

SPEA was created in 1972 to address complex issues in public policy, public finance, and environmental science. SPEA's faculty is diverse and committed to high quality research. Research is funded from multiple sources, such as the World Bank, the Environmental Protection Agency, the National Institutes of Health, the National Science Foundation, and the National Endowment for the Arts. SPEA faculty members frequently work in more than one research area, and often collaborate across disciplines. The School hosts four major journals under the editorial direction of faculty, including the Journal of Policy Analysis and Management, Public Administration Review, Public Budgeting & Finance, and Small Business Economics.
