The State Epidemiological Profile is a tool for state policymakers and community leaders, to support the development of a data-driven framework and advance the mission of the Indiana Substance Abuse Prevention System. The 2009 profile is the fourth annual report in the series. The Chart Pack is a companion document to the report, providing all figures in an easy copy-and-paste format.

The Chart Pack may be accessed here.

The epidemiological profiles as well as a variety of supplemental reports can be accessed at www.policyinstitute.iu.edu/health/EPI.
